

Oncor Commercial Midstream HVAC Program

Oncor is pleased to announce we have launched a new Commercial Midstream HVAC Program. Through this program, Service Providers will have an opportunity to purchase high efficiency commercial HVAC equipment from participating distributors and offer instant discounts to Oncor customers for qualifying equipment. Participating in this program will allow you to be more competitive in the market, leverage utility incentives to help you build your business, and provide your customers with higher efficiency equipment options at a lower cost and greater return on their investment.

Oncor HVAC Midstream Equipment Measures

Moving forward, Service Providers will be required to submit eligible HVAC projects for certain equipment measures to their participating distributor through the Midstream HVAC Program. The following equipment measures will be offered exclusively through the Midstream HVAC Program:

- Air Conditioner – All Heating Types (Split / Mini Split and Single Package)
- Air Source Heat Pump (Split / Mini Split and Packaged)
- PTAC and PTHP

Oncor Commercial Standard Offer Program (CSOP) Equipment Measures

Oncor will continue to offer certain HVAC equipment measures through our existing CSOP. Effective October 1, 2021, only the following HVAC equipment measures will be offered for new CSOP projects:

- Chillers
- Variable Refrigerant Flow (VRF)
- Geothermal
- Water-Cooled DX

HVAC Midstream Program Participation

Oncor has selected ICF as the Program Implementer for the HVAC Midstream Program. If you have additional questions about this program, you can contact Chris Coronel, ICF's Account Manager at Chris.Coronel@icf.com, (817) 818-9461. If you are ready to get started and participate in the program, a list of participating distributors and contacts is provided below. If you are currently working with a distributor that is not on the list, please contact ICF to determine if your distributor can be included.
